IFIF's Vision

One global voice for our industry

“IFIF’s vision is to provide a unified voice and leadership to represent and promote the global feed industry as an essential participant in the food chain that provides sustainable, safe, nutritious and affordable food for a growing world population.”

IFIF's Mission

- Represent the global feed industry with international governmental organizations and agencies, including the FAO, WTO, WHO, OIE and CODEX Alimentarius, on crucial global feed and food issues.
- Promote science-based solutions and information sharing for the feed industry by facilitating global forums, such as the Global Feed & Food Congress (GFFC) and the International Feed Regulators Meeting (IFRM).
- Promote a balanced regulatory framework to support a fair global playing field, facilitate market access and support the competitiveness of the feed and livestock industries.
- Expand the global network of national and regional feed associations and promote the adoption of international standards and global equivalency.
- Continue to support and encourage the sustainable development of animal production.

IFIF's 3 strategic Pillars of work & priorities

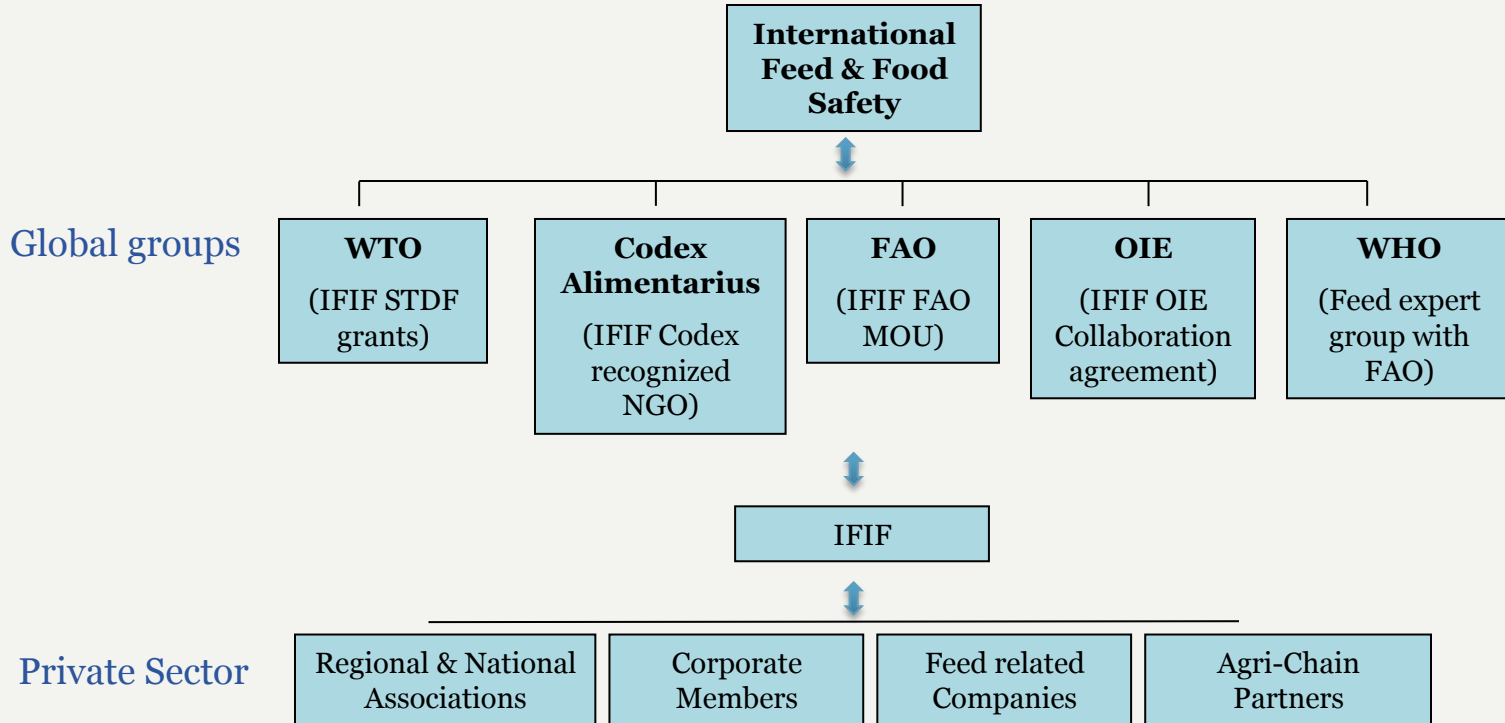

Sustainability	Regulatory & International Standards	Education & Best Practices
Specialty Feed Ingredients Sustainability (SFIS) project	International Feed Regulators Meetings (IFRM)	FAO IFIF Manual of Good Practices for the Feed Industry
Global Feed LCA guidelines Institute - globally applicable feed LCA and metrics	Regulatory Convergence Project	Capacity Development for Feed Safety
Partnership on Livestock Environmental Assessment and Performance (LEAP)	Engage with Codex to establish science based standards for feed safety and trade	Global Feed & Food Congress
Global Agenda for Sustainable Livestock	OIE collaboration	

Pillar II: Regulatory & International Standards

IFIF collaborates with the FAO, WTO, WHO, OIE and CODEX, to help **set effective international regulatory standards** for the whole feed chain, and aims to harmonise these globally, ensuring its safety and access to markets in order to provide safe feed & food and **facilitate fair trade**.

- IFIF FAO Feed Manual
- Codex Feed work
- Regulatory Convergence Project covering Canada, European Union, and United States
- OIE formal collaboration

IFIF work with global groups & partners

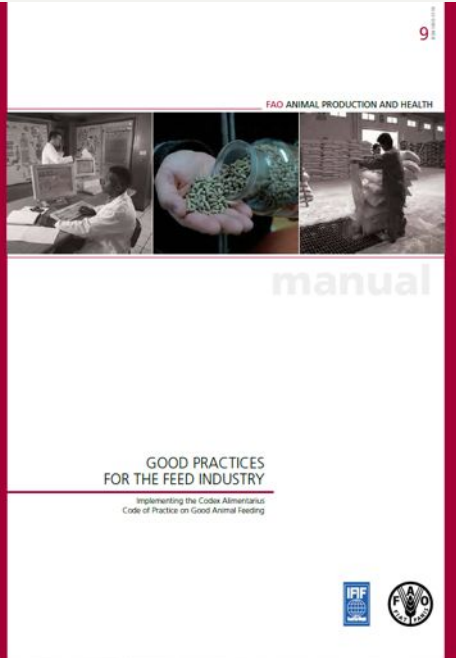

Regulatory and International Standards

IFIF FAO Feed Manual

- **2010: IFIF – FAO Feed Manual**

- Practical guidelines to implement the Codex Alimentarius Code of Practice on Good Animal Feeding
- Promotes the spreading of good manufacturing practice and general principles on the production of safe feed ingredients and their mixtures
- An unprecedented collaboration between private sector and International body

Regulatory and International Standards

Codex Alimentarius

- **2011– 2013** : participation to the **Codex Task Force on Animal Feeding (TF AF)** which has led to the adoption by CAC :
 - Guidelines on application of risk assessment for feed
 - Guidance for use by governments in prioritizing the national feed hazards
- **2015-2016** : participation to the **eWG on the carry-over of unintentional residues of veterinary drugs in feed**

Regulatory and International standards

Regulatory convergence

- **2012: ‘Comparison of approval process and risk-assessment procedure for feed ingredients’**
 - Project launched at the 4th IFRM meeting in 2011 and presented at the 5th IFRM meeting in 2012
- **2013: Extension of the project to other jurisdictions**
 - Canada, EU, USA and Brazil, China, Japan, South Africa
 - Publication of the report in 2013
- **2014: launch of the global convergence Project**
 - First: Focus on Canada, EU and the USA
 - Long term objective: to enable the convergence / harmonization of technical requirements for the safety assessment of feed ingredients between jurisdictions globally
