

Importance of SFIS as the link between feed and food efficiency on the farm

Philippe BECQUET; SFIS Management Board Chair

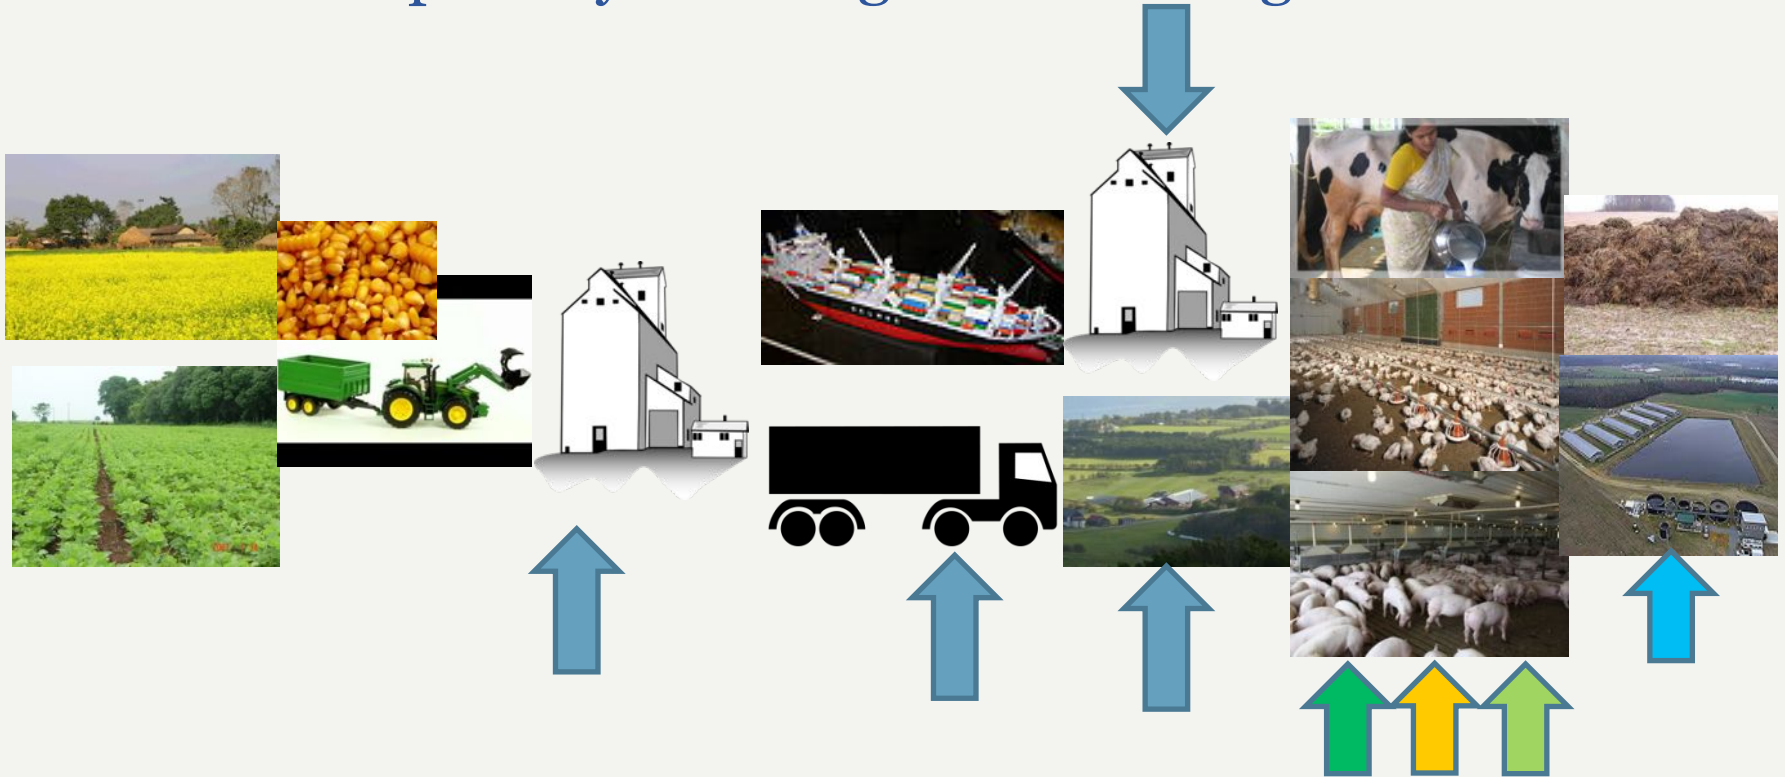

Content

- Specialty Feed Ingredients along the feed / food chain
- SFIS Project Long Term Strategy

Specialty Feed Ingredients

- Feed ingredients with a specific function:
 - Feed loss reduction / quality improvement
 - Micronutrition
 - Nutrient excretion Management
 - Animal performance
- Incorporated in feed

Specialty Feed Ingredients along the chain

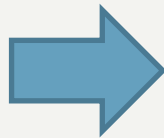

SFIS Project Strategy

- Objectives:
 - All types of animal production
 - All types of functions
- Taking into account
 - Influence of Specialty Feed Ingredients along the chain
 - Importance of Specialty Feed Ingredients on farm
- Stepwise approach
 - Based on the work of phase 1 (amino acids and phytase)
 - Step by step development

SFIS Strategy Main Steps

- Validation of Product Category Rule on nutrient excretion
- Introduction of Emission Factor modification
- Impact of technological additives
- Other impacts (e.g. product quality)

Complete Product Category Rules as
a piece of the whole LCA approach
